

# Virtucom's Esports Solution

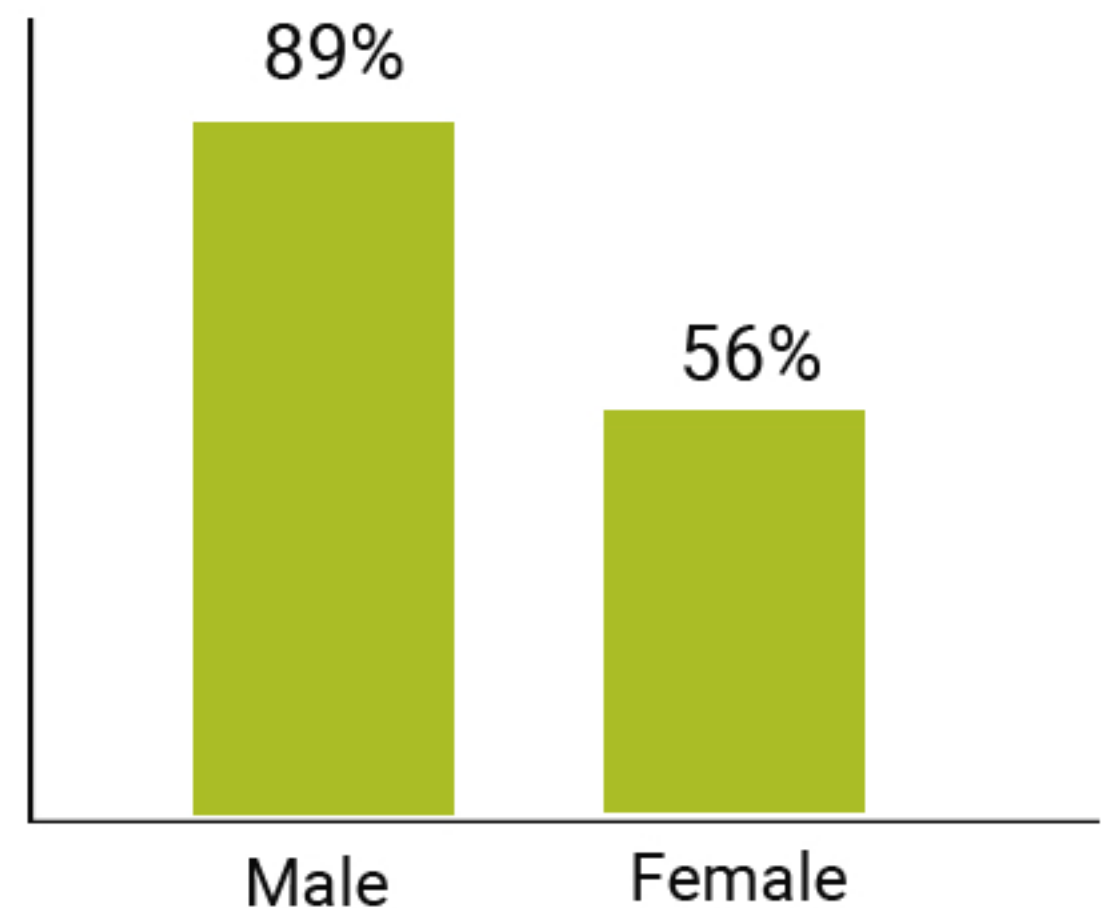

Higher Education continues to create and expand Esports Programs. What does this mean for you?

Colleges and universities are considering early research that indicates participation in Esports programs shows increased interest in STEM fields of study and careers. In turn, these same Higher Education Institutions are looking to high schools to recruit top talent for their esports teams, offering growing study programs and degrees related to esports, and providing scholarship opportunities

## Esports Higher Ed Survey of 291 Schools Will You Explore Creating An Esports Program In The Near Future?

## Multi-Gender Influence Percentage of 14-21 year olds who play or watch video games.
