

Esports in Education

Possibilities with Esports

Esports are more than competition. Students can broadcast, create photos and videos, run digital ad campaigns, manage their team's social presence, plan live events, and more. Schools have a unique opportunity to provide academic classes and real-world project-based learning on a topic proven to motivate students. Colleges are offering esports scholarships and majors. Employers are looking for candidates who can demonstrate success in connecting them with younger audiences.

Why OMEN?

We champion gaming, and those who game, by supporting them as they progress. Our diverse products and services help all gamers play better. OMEN works to make the gaming ecosystem healthier and more inclusive for everyone through our strategic partnerships.

OMEN Obelisk – Entry Specs

Everything you need to compete on today's games at 1080p on medium settings. Great for most school applications.

Specs:

- Nvidia® GeForce 1660 Ti
- 9th Gen Intel® i5-9400; Air Cooled
- HyperX® 8 GB DDR4-2666 SDRAM
- 256 SSD + 1 TB HDD
- Windows 10 Home or Pro
- OMEN 25" 144hz Freesync Display
- Entry Gaming Peripherals

OMEN Esports Station

Bundle an OMEN Obelisk or laptop with a high refresh rate gaming display and a full line of peripherals to create a complete gaming station for students. High refresh rate displays ranging from 144hz-240hz with adaptive sync technology ensure students never miss a moment of the action. Choose between different tiers of mechanical keyboards, adjustable dpi mice, surround sound headsets with mic, and different sized mousepads. Step up the specs so students can be creators as well as competitors

Go to Market

Use OMEN's Esports Experts as sales resources to design effective solutions for your customers. They can consult on facility design, hardware, infrastructure, games, academic applications, and even aspects of team management to ensure your customers get the solution that fits their needs.
