Harness Technology and Enhance Education

Schools integrate technology into the education process for one reason: to help every student succeed.

Founded in 1995, Virtucom provides end-to-end technology and service solutions to public and private schools and districts of every size. Over the years, we’ve given nearly 3 million students access to the newest educational technology—and our involvement doesn’t stop there.

Virtucom goes above and beyond to make sure we are happy with their service as well as the equipment we order... I can truly say that they put the customer first.

Jeff Ritter, Director of Technology, St. John’s School, Houston, Texas

Virtucom and You

Worried about making it work for your budget? We understand your challenges. Our fixed costs help make your monthly and annual budgets predictable, so you can integrate technology into the classroom seamlessly. We’ll be there every step of the way—equipping you with the tools and knowledge you need to get the most out of your investment.

Comprehensive Solutions and Ongoing Support

You don’t have to pick from a menu of services—we tailor our solutions to your school or district, including:

• Strategic planning  
• Infrastructure and IT management  
• Streamlined deployment  
• Customized leasing and financing

As we develop a relationship with your district, we become a true extension of your existing staff. We’ll even set up camp in your county to ensure a smooth transition. Through ongoing support and professional development, our deep and vested partnership makes technology sustainable—creating a seamless learning environment for students and teachers.

“
It’s rare to find a business like Virtucom that will take the time to listen to the needs of our school system and then try to think out of the box to help meet those needs.

Cindy Johnson, CTO, Lee County Schools, Sanford, North Carolina

Our responsive and uncompromising service gives your staff the freedom to focus on what it does best: enrich education.

Let's see what we can do together.
