

Financing

With diverse, personalized financing options, Virtucom can help you enhance learning with the best hardware and software out there—and the tailored, ongoing support you need to manage it.

A limited budget doesn't need to prevent you from modernizing your school's equipment and programs. Our leasing solutions make your monthly expenses predictable, so you can focus on other areas of need. With rare down payments and minimal upfront costs, we can help keep your budget intact—focusing on specific billing dates and timelines.

Virtucom's process is simple and efficient: learn about your school, design and approve a personalized plan, and provide 100% financing for your entire bundled solution—never specific to a device or manufacturer. We streamline your acquisition process with straightforward, easy-to-read documentation. We can help your school or district with leasing, Hardware as a Service (HaaS), E-Rate, Title I Program and grants.

Let's see what we can do together.
